Life Safety and Security Door Hardware

Integrated Door Security Systems

Safety, Security and Risk Management

Detex designs for retail

Detex offers the broadest line of life safety and security door hardware designed to meet the durability and performance requirements of the retail industry—without compromise. We offer solutions for every life safety and security door, with more options for specific applications.

INCLUDED IN
HARDWARE KIT

Hardware solutions for any store, for any door

Whether your business is a chain of casual restaurants, a group of big box stores or a single fashion outlet, life safety and security door hardware is a necessity. Not just for back doors, Detex door hardware is engineered precisely for certain retail situations, but also provides choices for a wide range of functions and costs. Our retail customers are often surprised to learn that we can supply most of their door hardware needs.

Where trust is built

Chosen by architects, locksmiths, loss prevention managers, maintenance supervisors and contractors who need hardware that has the options they want, our hardware is easy to install and requires minimum maintenance. Industry professionals know from experience that Detex products will always work when called upon.

Life safety and security door hardware designed just for retail

Many of our hardware products have been developed specifically for retail applications. These are the solutions to problems that stores, restaurants and other retailers must address every day, such as loss prevention, access-controlled customer entry, emergency exit control, merchandise deliveries, employee entrances, trash removal, securing outside gates, and more. Their design has evolved with the help of customer input, seasoned with our decades of experience in the marketplace. More than forty of our products are uniquely appropriate for retail use.

Systems for your specific applications

Our hardware components combine easily into complete systems that allow you to achieve different levels of functionality for your specific retail applications. Select systems for maximum security locking; outdoor gates; emergency exits; sales floor to stockroom security; shoplifting prevention; tailgate detection; and employee entrances. You can be sure that they will integrate effectively with each other and perform well. Without compromise.

Extra-tough hardware.

Maximum Security System

For retail applications that call for the tightest security involving panic hardware, Detex offers a choice of very powerful deterrents. Choose the functionality you need to provide the level of security you want.

- **230X MAX Multi-Point Panic Hardware** is engineered for maximum locking strength with extreme-duty, triple-bolt design that withstands 16,000 pounds of pull force. Single- and double-bolt and weatherized models available.
- **V50 and 20 Series Surface Vertical Rod Exit Devices** for double doors offer dependably tough protection.
- **Door Prop Alarms** are designed to sound a warning when doors are propped open. Battery powered or wired.

Ideal for garden centers, lumberyards, patios.

Outdoor Area System

Where gates and doors are exposed to weather or moisture, panic hardware has to stand up to rain or snow. Detex offers a system with various weatherized applications.

- Available in **EasyKit®** with everything you need, including easy-to-follow installation and wiring guide.
- **Weatherized Panic Devices with delayed unlocking** prevent shoppers from slipping out with merchandise. Secure two-point locking has 15-second delay and 100dB alarm.
- **Access Control Devices** allow entry from outside with keypad or card reader.
- **DX Bolts** further secure outside area by preventing hinge cutting.
- **Weatherized Door Prop Alarms** add to your system with an audible warning of doors being propped or held open. Battery powered or wired.

Good looks. Premium quality.

Emergency Exit System

When fire or other threats require a quick exit from the building, Detex life safety and security hardware offers a reliable way out for customers and employees —panic hardware designed for the demanding needs of the retail industry, and for reduced maintenance and long life.

- **Advantex® Premium Exit Devices** are engineered for safe exit and secure entry in high traffic locations like retail stores and restaurants. With six architectural finishes and industry-leading electrified options, Advantex panic hardware offers multiple possibilities for assembling the right system for your premises.
- **ValueSeries® Exit Devices** are priced to be an economical option for durable life safety and security hardware. Designed for use on all types of single or double doors, with or without mullions, this hardware is suitable for every application from employee exits to weatherized gates. ValueSeries hardware is available with options such as alarms, electric integration, electric dogging, electric latch retraction, and delayed egress.

Employees only.

Sales Floor to Stockroom System

This Detex system deters customers from entering stockrooms, but during an emergency provides a life safety path through the stockroom. It includes access control for employees, and an optional alarm if the door is left open. For use on single or double doors, with or without mullions.

- **Alarmed Panic Devices** can be wired or can operate with a 9-volt battery.
- **Access Control Keypads and Card Readers** have flexible programming capability and options such as anti-tamper switches.
- **Door Prop Alarms** alert staff with a 100dB alarm when a door stands open. Door-open times can be field-set. Battery powered or wired.

Adding new layers of theft security.

Anti-Shoplifting System

Detex provides various anti-shoplifting components to ensure the level of protection you need for your business. Customers who try to go out a side door or back door will be detected immediately, as if a guard were on duty.

- **Panic Devices with delayed unlocking** sound 15-second, 100dB alarm to alert staff of exit attempt. Allows panic unlocking after time delay. Available in Advantex and ValueSeries lines, and in weatherized model for exterior doors and gates. EasyKit version supplies rim device, electromagnetic lock, a Logic Controller power supply, and everything needed for uncomplicated installation.

- **EAX® Series Exit Alarms** for secured door applications that require a 9-volt battery powered or external wired alarmed exit device can be bypassed if needed for deliveries. Automatically resets when closed.

- **Door Prop Alarms** sound when door has been propped or held open for a pre-set time. Battery powered or wired.

Members only.

Tailgate Detection System

If your business is a members-only operation, such as a fitness facility, or a card-required warehouse store, you want to be sure that no one sneaks through undetected, behind a member, during or after hours.

You may also need to protect areas within your facility. Stockrooms or employee-only areas should be off limits to customers or others who have no business there, and this hardware prevents unauthorized tailgate entry. The Tailgate Detection System is compatible with most access control technologies, is easy to retrofit, and has an integrated door prop alarm for extra security.

- **AT5200 Tailgate Detection System** employs infrared sensor beams to detect followers, so that unauthorized people trigger an annunciated alarm.
- **Access Control EasyKit** provides the components you need and is easy to install.
- **Door Prop Alarms** alert you to an entrance door that has been deliberately propped open to admit non-members.

Secured entry for employees.

Employee Entrance System

When your employees arrive for work at their designated entrance, or want to relax in the break room during their shift, they need to get in without a hassle. So you need a dependable access system that can be installed without complications.

- **Access Control EasyKit** includes all the hardware, wiring and riser diagrams that are required. It's easy to order with one specified catalog number, easy to install with clear instructions, and easy to use because it's designed to be rugged and trouble-free. You can keep track of a few employees or dozens, with the features you need to manage constant comings and goings. From access control with latch retraction to audit trails for management to weatherized trim, you'll find everything to make employee entry simple and efficient.
- **AT5200 Tailgate Detection System** keeps followers from entering.
- **Door Prop Alarms** alert staff to open entrances.

More options at every entrance and exit

Only Detex offers you system options to fit your specific needs, from basic to more advanced. All of our hardware systems are field-proven to integrate and work, without compromise.

Indoors, outdoors, back and side doors, Detex has the right hardware for the life safety and security requirements that protect your employees, customers and premises. From garden center gates to stockrooms, architectural doors to delivery doors, tailgate detection entrances to delayed egress side doors to guard tour data verification, every retail application is covered in our inventory.

Detex delivers the goods for retail

For front doors, back doors, side doors, automatic swing doors, interior doors—wherever life safety and security hardware is required in a retail environment—Detex can supply the best-engineered, most reliable products for the job, with the most options for every door.

Consider the extent of our inventory, remember the Detex reputation for quality, and chances are you will choose the hardware that meets the durability and performance requirements of your business. For extra protection in certain retail environments, anti-microbial coating is also an option.

Providing security for your premises, and life safety for your employees and customers is critical for your retail operation. This is not the time, and your business is not the place, to go with second best.

Long life, low maintenance and repair costs

Durable and well-made, Detex products are designed to last a long time with fewer problems, and that means significant savings in maintenance and replacement costs over the life of the hardware. Because we constantly solicit input from our customers to ensure that our products are meeting our high standards in the field, we have learned that you truly appreciate the value of quality. Locksmiths like the ease of installation, maintenance people are pleased with the dependability, architects recognize the handsome design. They all put their trust in Detex for trouble-free performance.

As always, our customer support staff is ready to answer your questions about your specific retail applications.

For more than a century,
we have earned the trust
of millions of property owners
who rely on high quality
Detex products for
the safety and security
of people and property.
