

DTX-LMB-DATA Interface Module

Interface module for use **only** with the BEA BodyGuard Presence Sensor, an overhead-mounted sensing device providing detection for triggering automatic swing door safety features and functions. The DTX-LMB-DATA Interface module will interpret these and convert to required signals that the AO19 controller will use in accordance with the firmware and operate the doors with no errors. The DTX-LMB-DATA is a 24VAC/DC, @50 mA, electronic module, in a 4"x 2" x 1" (approximate) plastic enclosure that houses the PWA and logic circuits.

Benefits

- Small package, fits into the AO19 enclosure
- Easy to connect
- Self-contained with logic circuits and wiring
- Interface module converts Data+ signals from BEA BodyGuard Presence Sensor when used with AO19 controller

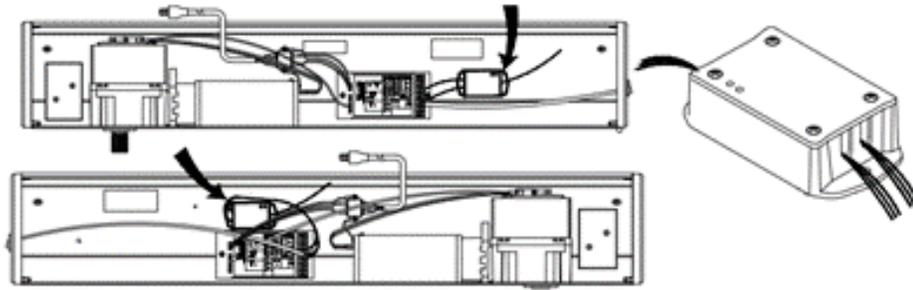

Features

- 2 wire input from 24VAC or DC UDC 1000 output terminals, or 24VAC
- Easy to read instructions and color-coded wiring
- Easily converts signals into useable voltages to activate a Safety A input from BEA BodyGuard Presence Sensor
- Connects directly to the Data+ line outputs of the BEA BodyGuard Presence Sensor

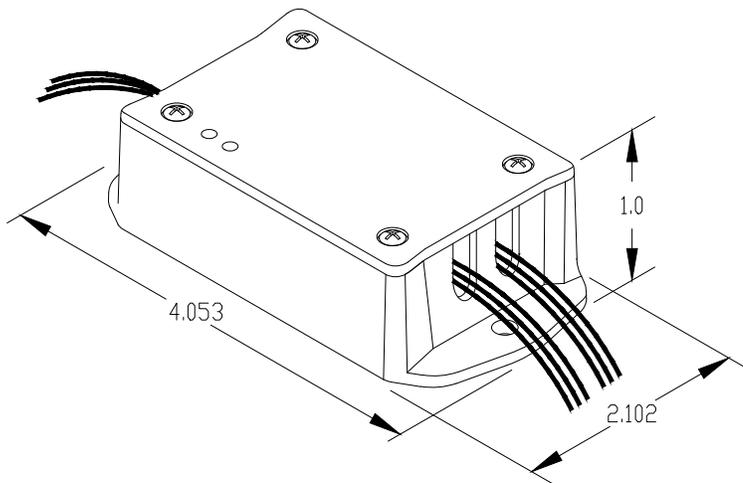

Technical Information

- Input voltage: 24VAC/VDC
- Physical size: 4" x 2" x 1" approx
